

## Beware!!!

Not all powdercoating is the same. Our fences go through a special multi-stage pre-treatment that ensures the coating will adhere properly and does surpass the strict Australian Standards testing. Tests show coating on fences that are not pre-treated properly will fail within one tenth of the minimum time required to meet the Australian Standard AS4506 for powdercoated products.

## Warranty

We are proud of the products we produce, however in any manufacturing process there can be occasions where a defect occurs. Fencespot guarantee that should your fence have a fabrication or installation defect within 2 years we will rectify it for you.

Manufacturers of Fences and Gates for all locations

# Fencespot

Excellence in fencing

There are plenty of other fencing companies so why choose Fencespot?

*Because we have the experience and expertise to provide what you need when you need it.*

*Because our quality is equal to or better than anything on the market.*

*Because we make to measure for your site saving wastage and money. Because we strive to keep our overheads down so that our prices are always very reasonable.*

*Because we don't just talk the talk, we walk the walk and back it up with a 2 year warranty*

*Because we really do care.*

## Tubular fences

Our great range of tubular styles will compliment any home and can be made from steel or aluminium. The tubular steel we use is Australian made to Australian standards.

This gal-tube steel has the highest coating of galvanizing on the market and is excellent for most locations. While aluminium is a lighter material and not quite as robust as steel, it resists corrosion and is ideally suited to seaside locations or beside salt water pools. A few years ago aluminium cost three times as much as steel. Now the costs are much the same, however the saving by using aluminium in a marine environment instead of steel that requires special protective coatings are truly substantial.

## Slats • Pickets • Louvers

Aluminium slats have almost totally replaced timber because they will not rot, warp or need repainting. This modern fencing design can be powdercoated in almost any colour to suit your décor. When we press a decorative top into one end and run the picket vertically it becomes the finest picket fence around. For those who prefer the natural timber look, our cedar smartwood slats have the look without the maintenance.

## Glass

The fence you look straight through. With China's excellent quality products recently entering the market, prices have dropped considerably making glass a very viable option. Our glass fences can be either frameless or semi-frameless. The up market frameless fence is installed onto small metal mounts so there are no posts to be seen. If your budget does not extend to this then our semi-frameless fence is a great alternative. The glass panels are installed between aluminium posts that can be painted any colour you choose. If you are concerned about dirty glass then let us apply the enduro-shield to take the effort out of keeping the fence clean.

## Gates

Big gates, little gates; we make them all, from single access gates to swing or sliding driveway gates that can be fully automated. We engineer each gate for each location, and while any of our standard fencing styles may be used for gates, you may even ask for something unique.

## Security

Whether you want to keep the robbers out or whether you need to keep them in once they are caught, we have the product for you. Our standard range of fences is ideal for the domestic market, but when the situation calls for a higher specification our heavy duty range will meet every expectation.

## Commercial Projects

At Fencespot we are not limited to small domestic jobs. We are contracted to provide the fencing and gates for many schools, sub-divisions and commercial sites all over Perth. We have the quality and expertise to win the confidence of government, councils and developers and when it comes to price advantage we are well positioned in the market place.

### 100 colours to choose from

*Powdercoating is an oven baked finish that not only looks great but is extremely durable. There are more than 100 colours to choose from and we now carry a special 'fence grade' range that is made to withstand our harsh Aussie climate.*
